

In year **2912**, the *Spaceship Titanic* was launched. It's Major aim was to transport emigrants to different exoplanets. One light-day, while the spaceship was transporting emigrants of over **8000**, it collided with a **spacetime anomaly** hidden within a dust cloud. Though the ship stayed intact, almost half of the passengers were transported to an **alternate dimension**.

The passengers who boarded the spaceship were 0-80 years old and from analysis, **17-49 years** olds were mostly transported.

The spaceship had **7 cabin decks** in it ranging from **A-G**. The cabin deck is a place where passengers sleep. It also has 2 sides, the **P and S side for each deck**.

The **F and G decks** had the highest numbers of passengers and also the highest **transported cases**. More cases of transported were reported from the S side of the cabin.

Most of the passengers Home Planet was **Earth**, followed by Europa. Passengers going to **TRAPPIST-1e** were also more than others and most were **transported**.
